

## **Green Valley RC Flyers Meeting Highlights**

**April 11, 2011**

Gary Johnson, President, presided. 18 members attended.

The club bank account as of the meeting had a balance of \$4,462.42, including \$3,000 in the capital fund.

Flying field reports:

Flattop: Gary and Jerry did a quick cleanup of the storage shed, but the shed needs a new floor.

FICO: Fred reported that the shed needs a new floor, but there is no rush.

Sahuarita Landfill site: Ken Fleshman volunteered to contact the county regarding the possibility of flying gliders from the hill on the landfill site.

Continental School Radio Club: The entire Radio Club was scheduled to visit our FICO field for a field trip the day after the club meeting. Gary and Jerry would put on a flying demonstration and the RC plane students were to fly the school planes.

Father's day static display: Gary reported on planning for a static display at the Rancho Sahuarita club house for Father's Day. After a site visit, requirements will be developed and club members will be asked for help.

AMA News: Jerry reported on the effectiveness of the AMA's Congressional Awareness Campaign regarding proposed FAA regulations on our hobby.

Club T-shirts: Jim Knudson volunteered to get estimates from a Green Valley business for making club shirts.

Show and Tell:

Ted Dore showed a Focke-Wulf Fw-190 that he inherited from Jose Castro. Ted is restoring it. He reminded everyone that his shop is a "No Kill" shop. The plane is powered by an OS .46 and is covered with Orocover and Monocote.

Art Siri brought a North American T-28 that he "rescued" from the TRCC Club Swap Meet. He offered to sell it to any member at cost. Art would also sell a Cermark SPE-26 or Turnigy 26HP-S with the plane. The aircraft included air retracts.
